EDUCATION

Vytauto Didiojo universitetas
Bachelor GPA: Computer Science

Lithuania
2013 – 2017

ABOUT ME

Python software engineer with 8+ years of commercial experience, building and evolving ERP systems that power core financial processes like sales, invoicing, and integrations with leading payment providers. I've owned the full development lifecycle, from gathering product requirements and designing scalable architectures to implementing robust, well tested features and automating deployments via CI/CD pipelines.

WORK EXPERIENCE

Gurtam
Lithuania

Vilnius,

Python Developer

January 2024 – Present

- Architected and implemented a **unified billing and invoicing system** for five our company's product's, consolidating previously detached modules into a single platform and reducing monthly manual bill consolidation effort by **380 human work hours per month**.
- Automated **payment reconciliation workflows** matching invoices, payments and credits against bank statements which cut reconciliation time by **60%**, saving the accounting team **350 human work hours per month**.

Sandas, UAB
Lithuania

Vilnius,

Odoo/Python Developer

June 2018 – January 2024

- Led the design and delivery of a comprehensive **sales, billing, and field-service platform** for one of Lithuania's largest telecom operators, resulting in a savings of 5,400 human hours within the first three months after launch.
- Automated **billing and invoicing workflows** by implementing a **rules-driven engine**, reducing average invoice processing time by 75% (from 8 minutes to 2 minutes), saving 550 human hours.
- Developed a **real-time inventory management module** with **barcode scanning** and **predictive restocking alerts**, reducing weekly inventory time per team member from 3.5 hours to 1 hour and decreasing reconciliation errors by 68%.
- Created a **tablet-first technician dispatch and routing application**, enabling field teams to assign stock, complete e-signatures, and receive dynamic schedules, saving 1.5 human hours per day per team across 40 technician teams (about 1,200 hours per month) and improving on-time installations by 20%.

Draugiki sprendimai
Lithuania

Vilnius,

Odoo/Python Developer

June 2017 – June 2018

- Extended **Odoo ERP** with **Shopify connector modules**, automating synchronization of product catalogs and orders between Odoo and Shopify.
- Developed advanced **price-list calculation and assignment logic** within Odoo, reducing manual pricing adjustments by **120 human work hours** per month.
- Implemented automated workflows for **sales order creation, stock picking assignments, and invoice confirmations** using Odoo's ORM and scheduled actions, saving **180 human work hours** per month.

SKILLS

Programming Languages: Python

Frameworks & Tools: FastAPI, Odoo, PostgreSQL, RabbitMQ, JavaScript, jQuery, OWL, Git, Grafana, Prometheus

DevOps & Cloud: Kubernetes, Docker, CI/CD, Monitoring, Observability

Languages: English, Russian, Lithuanian
